### **Concrete Hose Repair**

Available at our Campbelltown warehouse.

PCS is happy to arrange pickup and delivery of any damaged hose Australia wide using any one of our network of couriers

Please see our **Concrete Pump Parts and Accessories** booklet for a full range of items available to suit your shotcrete pump

# CONCRETE DELIVERY PIPE INSPECTIONS, TAGGING AND HYDROSTATIC TESTING SERVICE

#### Hose Inspections

We offer a free visual inspection on all concrete delivery pipes at our Campbelltown warehouse that involves:

- Testing the thickness of pipes using our calibrated thickness tester
- Wear and tear damage including the identification of any outer pipe damage that may affect the working pressure of the pipe.
- Corrosive damage to the pipe/fittings.

#### **Tagging**

- PCS works with our biggest clients in implementing a pipe management program using infochip® weldable RFID chips to tag each individual concrete delivery pipe.
- The RFID chips are welded onto the end of the pipe and are readable off any android phone.

### Hydrostatic Testing Service

- PCS has an in house hydrostatic testing service using recycled water with compressed air that can test concrete delivery pipes up to 170BAR.
- Tests are conducted in accordance to Australian Standards
- Each test certificate will link back to the RFID tag on the pipe being tested
- We can test new pipes as well as conduct the required yearly pressure testing on your pipe.
- PCS is happy to arrange pickup and delivery of any pipe that needs to be tested Australia wide using any one of our network of couriers
